

Claims

- [c1] What is claimed is: 1. A messaging system comprising:
(a) a wireless communication device;
(b) means for originating an electronic message including:
(i) a destination address associated with the wireless communication device; and
(ii) a time and date record at which to send the electronic message, associated with the originating means; and
(iii) an electronic message;
(c) means for performing the steps of:
(i) comparing the time and date with a time and date record;
(ii) creating an electronic message if the time and date match the time and date record; and
(iii) forwarding said electronic message to the wireless communication device via a selected communication connection.
- [c2] 2. The messaging system of claim 1, wherein the wireless communication device comprises a digital mobile phone.
- [c3] 3. The messaging system of claim 1, wherein the originating means comprises a client/server system.
- [c4] 4. The messaging system of claim 1, wherein the originating means comprises a mail server on the Internet.
- [c5] 5. The messaging system of claim 1, wherein the originating means comprises a web site on the Internet.
- [c6] 6. The messaging system of claim 1, wherein the communication connection is the Internet.
- [c7] 7. The messaging system of claim 1, wherein the communication connection is a direct connection from the messaging system to a message operator for transmission to the wireless communication vice.
- [c8] 8. The messaging system of claim 1, wherein the originating means is calendar software.

- [c9] 9. The messaging system of claim 1, wherein the originating means is a calendar software which is accessible through the Internet.
- [c10] 10. The messaging system of claim 1, wherein the originating means is a calendar software which writes to a database.
- [c11] 10. The messaging system of claim 1, wherein the originating means is a calendar software which writes to a database and said database has records that have time and date, destination address and message information.
- [c12] 11. A messaging system comprising:
(a) a wireless communication device;
(b) means for originating an electronic message including:
(i) a destination address associated with the wireless communication device; and
(ii) a time and date record at which to send the electronic message, associated with the originating means;
(iii) an electronic message; and
(iv) a calendar software with a database and said database has records that have time and date, destination address and SMS message information.
- [c13] (c) means for performing the steps of:
(i) comparing the time and date with a time and date record;
(ii) creating an electronic message if the time and date match the time and date record; and
(iii) forwarding said electronic message to the wireless communication device via a selected communication connection.
- [c14] .
- [c15] 12. The messaging system of claim 11, wherein the system reads the database, if the record matches the time then forward an electronic message to the wireless communication device via a selected communication connection.
- [c16] 13. The messaging system of claim 11, wherein the wireless communication device comprises a digital mobile phone.
- [c17] 14. The messaging system of claim 11, wherein the originating means comprises a

client/server system.

- [c18] 15. The messaging system of claim 1, 1wherein the originating means comprises a mail server on the Internet.
- [c19] 16. The messaging system of claim 1, 1wherein the originating means comprises a web site on the Internet.
- [c20] 17. The messaging system of claim 1, 1wherein the communication connection is the Internet.
- [c21] 18. The messaging system of claim 1, 1wherein the communication connection is a direct connection from the messaging system to a message operator for transmission to the wireless cocommunication vice.
- [c22] 19. The messaging system of claim 1, 1wherein the originating means is cacalendarofware.
- [c23] 20. The messaging system of claim 1, 1wherein the originating means is cacalendarofware the is acaccessible rough the Internet.
